Product Description

TrailMaster Panther 550X EPS UTV

Take on any terrain with the TrailMaster Panther 550X EPS, a rugged UTV built for work, play, and everything in between. With Electronic Power Steering (EPS) and a fully automatic transmission with reverse, driving is effortless whether you're tackling trails or hauling heavy loads.

Powered by a 498cc EFI engine and equipped with 4X4 four-wheel drive, the Panther delivers dependable performance with a top speed of 50 mph. A set of chrome 14-inch rims wrapped in 26-inch all-terrain tires plus 11 inches of ground clearance give you the stability and capability to handle mud, rocks, and rough ground with ease.

This UTV isn't just tough—it's practical. A 550 lb dump bed makes hauling gear simple, while the 7.93-gallon fuel tank ensures longer rides between fill-ups. Standard features like a digital speedometer, 3000 lb winch, and windshield add convenience and protection, rounding out a machine that's as versatile as it is powerful.
